Washington, DC 20530

Dear Trial Attorney,

Microsoft is the STANDARD OIL TRUST of the 21st Century!

Microsoft is NOT a technology leader.  
They follow & copy others technological  
developments. Their products are of poor  
to mediocre quality at high prices considering  
their value. The only thing they have going  
for them is that in essence they have  
Monopoly Market Domination with 95% of the market  
in computer operating systems. Were that not so  
we would all be paying much less for computer  
software of much better capability, reliability,  
quality and technological advances.

You will probably receive many email comments  
from a supposedly non-profit organization  
"Americans for Technology Leadership" ([www.techleadership.org](http://www.techleadership.org))  
which is surreptitiously sponsored by Microsoft. I'm sending my  
comments by separate email to you as I suspect that were  
I to submit these comments thru them the message would be  
deleted.

Microsoft is the STANDARD OIL TRUST of the 21st Century!

MICROSOFT should be fined \$10 BILLION and BROKEN-UP into  
about half a dozen smaller companies.

Best of luck to you in your suit against Microsoft!

Carl Monroe
